

# BULFORD BARRACKS SHELTER SOLUTION

At the beginning of 2021, the British Army released a public tender, requiring a selection of Strength and Conditioning Shelters for camps around the UK. BeaverFit specialise in the design and manufacture of fitness equipment, container gyms and tactical training solutions – making us the strongest candidate in the delivery of this project.

This large facility is the peak of innovation, set to introduce a new form of training for the troops that enables them to train in the elements. Ensuring that they are prepared for weather variations when out on deployment and helps to avoid musculoskeletal injuries while also boosting their mental adaptation.

This particular facility was the first ever fully self sufficient outdoor training shelter built in the UK. Offering integrated storage, internal rigging, gym flooring, insulation, protection from the elements and fully functioning electricity.

**“THIS IS A GENUINE MODERN FACILITY, BUILT TO PROVIDE THE TROOPS WITH WHAT THEY NEED TO ENSURE THEIR PHYSICAL HEALTH AND WELLBEING, BOTH IN TERMS OF WHAT WE DO IN THE BARRACKS AND AROUND THE WORLD. THIS IS A REAL OPPORTUNITY AND A GREAT ASSET TO THE BRITISH ARMY.”**

**Major General Neil Thorpe**  
British Army

## BENEFITS + FEATURES

- ✓ Modular internal structures + storage
- ✓ Sized + scaled to budgetary requirements
- ✓ Solar powered + ventilation
