

FARM FITNESS

HYBRID FITNESS SPACE

With the increasing popularity of multi-functional fitness set-ups, Farm Fitness sought out BeaverFit to help expand their footprint and utilise their otherwise unused space.

Featuring an expertly crafted outdoor set-up from BeaverFit, utilising the Model Y Rig, Farm Fitness has since expanded their fitness offering by repurposing an old barn on their Essex-based farm. This sustainable conversion utilises bespoke wall-mounted BeaverFit Tower Rigs for stability and space saving, as well Eleiko strength equipment, all custom branded to suit Farm Fitness' unique aesthetic. By partnering with Eleiko for their Olympic-grade equipment and BeaverFit for their world-class, innovative rigging, Farm Fitness has maintained an exceptional quality and standard for their attendees and has further expanded their offering for both small and large group training.

“THE EQUIPMENT WE STARTED WITH WAS BEAVERFIT. AS A BRAND, THEY MERGE VERY WELL. THE FARM FITNESS AND BEAVERFIT QUALITY IS HAVING THE CROSS-LINK OF BEAVERFIT INSIDE AS WELL, IT WORKED KIND OF PERFECTLY AND THEN TOPPED BY ELEIKO AS WELL. THAT WAS JUST THE CHERRY ON THE CAKE REALLY.”

Tom Kemp

Founder of Farm Fitness

BENEFITS + FEATURES

- ✔ Utilised unused space
- ✔ Further expanding small + large group training
