# WHO WE ARE

Creator of the world's first fully functional containerised gym, BeaverFit is the leading global manufacturer of outdoor fitness equipment and training solutions. With a commitment to product excellence through cutting edge design and manufacturing processes, BeaverFit create innovative fitness equipment that provides a wide range of human performance training functionalities with industry leading durability for use in any outdoor environment.

Since 2010, BeaverFit has been the leading supplier of container gyms and outdoor fitness solutions to the U.S. and UK militaries, and continues to innovate and enhance both indoor and outdoor facilities for corporations, commercial gyms, universities, sports clubs and individual users.

Our solutions are manufactured to the highest of standards, exceeding all expectations. This methodology is at the heart of what we do, and represents the very foundation of which the company has been built.

*"We create what does not yet exist"*

*Tom Beaver  
Managing Director  
BeaverFit Ltd*

# PORTABLE

COMMERCIAL FITNESS EQUIPMENT

**THE GYM BOX (SINGLE RACK)** is a fully integrated, multi-use storage box, made up of a foldaway Garage Rack and storage compartment to store the equipment necessary to create a world-class, individual training solution.

The Gym Box converts into a portable pull-up rack and olympic lifting stand - it has room to carry kettlebells, bodyweight straps, rings and a variety of other fitness accessories. The TGB-SR fits easily in the back of an SUV and can be carried by two people. It is assembled with ease in less than 5 minutes.

**THE GYM BOX (DUAL RACK)** has four station areas all can be used as a pull-up stand or olympic lifting station.

The Dual Rack also has two configurations, one for smaller spaces and one for larger - all rigging for both versions come inside the boxes. The Dual Rack is easily transportable and assembled in just under 15 minutes.

#### DETAILS

- Squat Rack + Pull-Up Bar
- Delivery Available
- Optional Attachments Available
- Custom Colours Available

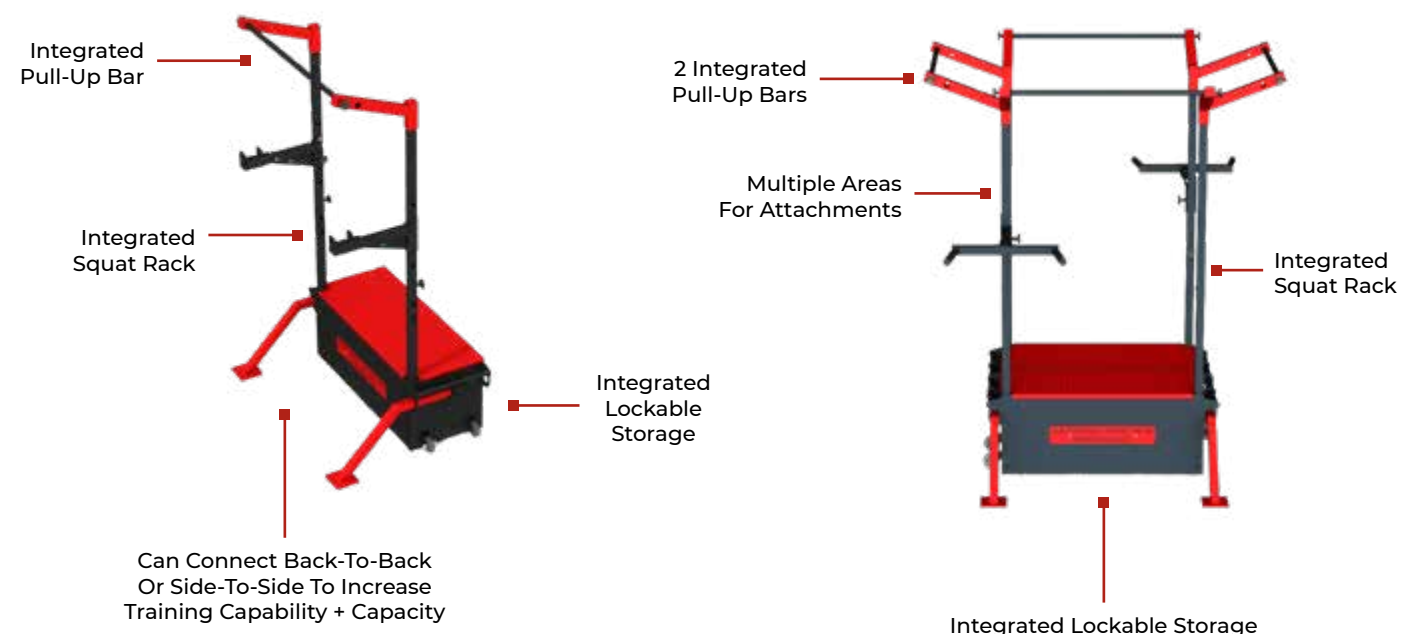

#### KEY BENEFITS

- Group Training Opportunities
- Quick + Easy Assembly
- Versatile + Portable
- Integrated + Lockable Storage
- Ultra-Stable Design
- Custom Branding Options
- Fits In The Back Of Most Standard SUV Vehicles

**THE GYM BOX (SINGLE RACK)**

**THE GYM BOX (DUAL RACK)**

THE BEYOND TRAILER™ is a “gym on wheels” providing an innovative mobile training solution combining training rigs and equipment storage for military commands, fitness professionals, commercial gyms, campus recreation, and athletics programs looking to expand where, when, and how they train. Patented design featuring folding strength racks that can be set-up by a single user in a few minutes with no tools required, the Beyond Trailer creates a unique fitness experience for training up to 30+ individuals at once.

ALL OUR FACILITIES ARE FULLY CUSTOMISABLE WITH UP TO 6 COLOURS FOR POWDER COATING. FOR BESPOKE OPTIONS, WE CAN CUSTOM MIX ANY COLOUR TO FIT YOUR BRAND AESTHETIC.

# CUSTOMISATION

---

COMMERCIAL FITNESS EQUIPMENT

OUR BEAVERFIT SOLUTIONS are designed to suit your particular requirements. From colour coating through to logo placement, we offer a range of customisation options to suit any aesthetic.

## COLOUR OPTIONS

One of the final stages of our manufacturing process is to apply a hard wearing powder coat finish to protect and colour the product. We offer a wide range of colours, to compliment your brand and ensure your facility best represents your desired aesthetic.

Here are just a few examples of our powder coated steelwork. Please note this is not the full range.

## CUSTOMISATION

BeaverFit are the experts in custom training facilities. From our own innovative models, to custom-built solutions, we can cater for any shape, size and available training space.

We offer guidance and support throughout your entire journey, enabling us to create a facility that best suits your needs and desired concept. Collaborate with our in-house design engineers to co-create something truly unique.

Our ability to manufacture custom training rigs and container gyms has been sought after by our elite customer portfolio; Cardiff Blues Sports Club, The Reebok Sports Club, Fusion Lifestyle, 1 Rebel, David Lloyd, Jumeirah Beach Hotel Group, Pump Gyms, Bulgari Hotel and many more.

20FT Functional Training Rig (FTR)  
David Lloyd

## CONCEPT

Our large team of design engineers have the ability to completely transform a concept into a 3D render. BeaverFit create bespoke container gym solutions that have been designed through innovation, offering a dedicated approach to each and every project. This allows our clients to create their own unique fitness facility that is tailored to suit their vision.

# OUTDOOR RIGS

COMMERCIAL FITNESS EQUIPMENT

**BEAVERFIT OUTDOOR RIGS** are durable and versatile, built to last, predominantly using 5mm steel. The Model range consists of three staple designs, alongside these set ups our BeaverFit Indoor Rigs can also be galvanised for outdoor use.

Each Rig needs securing to the ground for maximum stability. In some occasions outriggers or spreader plates can be used. Each frame is multi-functional, offering a facility that can be used by all levels of fitness.

All Rigs can be custom branded, this allows any solution to meet your desired aesthetic. This can be for both rig and logo plaque, as well as various other components such as J-Pegs and Dip Bars.

ALL OUR FACILITIES ARE FULLY CUSTOMISABLE WITH UP TO 6 COLOURS FOR POWDER COATING. FOR BESPOKE OPTIONS, WE CAN CUSTOM MIX ANY COLOUR TO FIT YOUR BRAND AESTHETIC.

#### DETAILS

- Easy To Deliver + Install
- Suitable For All Locations
- Built To Last With Robust Materials
- Develop Mental + Physical Resilience

#### KEY BENEFITS

- Galvanised For Outdoor Use
- Built To Last
- Custom Design Options Available
- Space-Saving Designs
- Adaptability To Suit Any Location
- Perfect For Group Training
- Multiple Exercise Bays

#### DESIGNED FOR

**ATHLETES:** Suitable for all athletes, ranging from sports clubs to universities.

**STRENGTH:** Designed with strength + conditioning in mind.

**MILITARY:** Complimenting a physical training regime, tried and tested by the elites.

**INDOOR + OUTDOOR:** All rigs can be galvanised + powder coated to protect from the elements, making them ideal for outdoor use.

## MODEL RANGE

The model rigs are our specialist outdoor set-ups. All indoor rigs can also be galvanised for outdoor use.

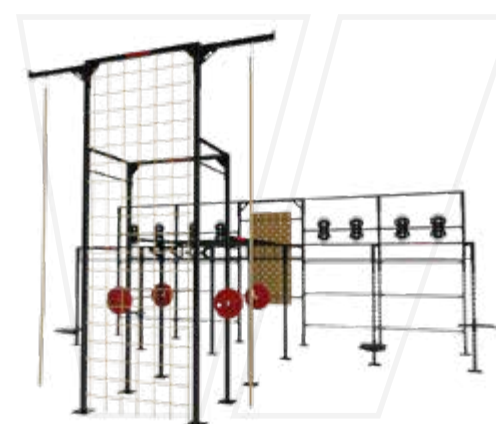

#### MODEL X RIG

# SUSTAINABILITY

COMMERCIAL FITNESS EQUIPMENT

## SUSTAINABILITY + ENVIRONMENTAL POLICIES

As part of BeaverFit organisational culture, we are committed to sustainable practice, + minimising any harmful impact on the environment through our day-to-day business conduct. This includes all activity undertaken at our headquarters in Shropshire, as well as installations completed on-site.

BeaverFit support strategies to reduce carbon emissions + promote environmental sustainability. BeaverFit are very critical when it comes to its own processes and has a high priority on minimizing the carbon emissions and impact on the environment.

As we consume materials, use energy, and generate waste in providing our solutions, we will think in a circular way.

We review the following aspects within our project processes:

- Use of water
- Use of electricity
- Use of gas
- Generation of waste
- Emission of smoke
- Emission of fumes
- Management of activities with potential pollutive outcomes

In order to act on the processes, we use the DEMING cycle. Plan, Do, Check, Act. Then we put a standard in place to assure we do not fall back into an old cycle.

Within BeaverFit, this plays an important role, and the progress is evaluated in the management reports on a quarterly basis.

By having objective data, we can streamline our processes and evaluate our efficiency.

Also, when looking at the scope of our products, they aid in the following ways:

- Advanced maintenance methods reduce waste and footprints
- Smart building optimised for efficiency
- Material recycling for fuel and components
- Packaging reduced on site. Our aim is to have zero waste across our business activities

## LOWER EMISSIONS + A CARBON NEUTRAL FUTURE

BeaverFit pledge to implement decarbonisation strategies through business change and innovations, including efficiency improvements, renewable energy, material reductions, and other carbon emission elimination strategies.

## CIRCULAR ECONOMY PRINCIPLES + RECYCLABLE MATERIALS USED IN BUILDS

Through our Circular economy pledge, BeaverFit will endeavour to reduce all non recyclable packaging and ensure that our recycled materials are assessed according to ISO 14021.

## STRICT CERTIFICATIONS + HIGHER COMPLIANCE

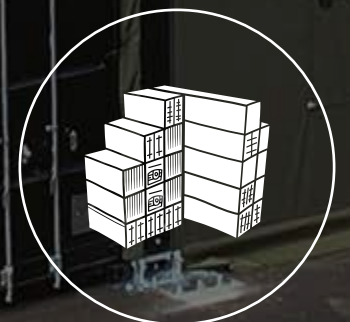

As part of our corporate social responsibility (CSR) strategy, we aim to mitigate our projects' impact on the environment, focusing our attention on both our environmental certifications and our supply chain. We will regularly assess our manufacturing processes to maintain and improve our operation from design through to manufacture and installation.

## MODULAR INFRASTRUCTURE

As a part of this initiative, BeaverFit pledge to ensure that up to 96% of our modular builds are made entirely of recyclable materials and renewable energy. Modular buildings can be relocated, repurposed and reused multiple times, enabling BeaverFit to supply some of the most ecological facilities that support climate control and lower the environmental impact.

## HYBRID WORKING

As a part of our employee satisfaction initiative, BeaverFit offer Hybrid Working to maintain a positive working environment and prioritise the mental well-being of our employees. In addition to this, Hybrid Working massively reduces our emissions and lowers our carbon footprint, co-aligning with our current Car Share Scheme.

# MARKETING + BRAND

---

COMMERCIAL FITNESS EQUIPMENT

**OUR BEAVERFIT TEAM** is committed to working in partnership with our customers and we are proud to have a strong focus on assisting our clients in growing, developing, and succeeding in providing the best service possible.

## DESIGN + BRANDING

A bespoke design and branding package is included in all projects, each and every rig, rack or container gym solution is customised to suit the clients desired aesthetic. Our team of talented design engineers provide digital renders and drawings that demonstrate use of brand identity and preferred colour scheme to depict an ideal fitness set up that best represents the clients brand.

Alongside logos, you can also position text or slogans on your container gym facility. Our high-grade steel can also be laser cut to depict brand logos or short slogans, based upon request.

The design team endeavour to offer both guidance and suggestions throughout the entire concept process, ensuring that the facility is best suited to the demands and requirements of the client.

## PROMOTIONAL VIDEO + PHOTOGRAPHY

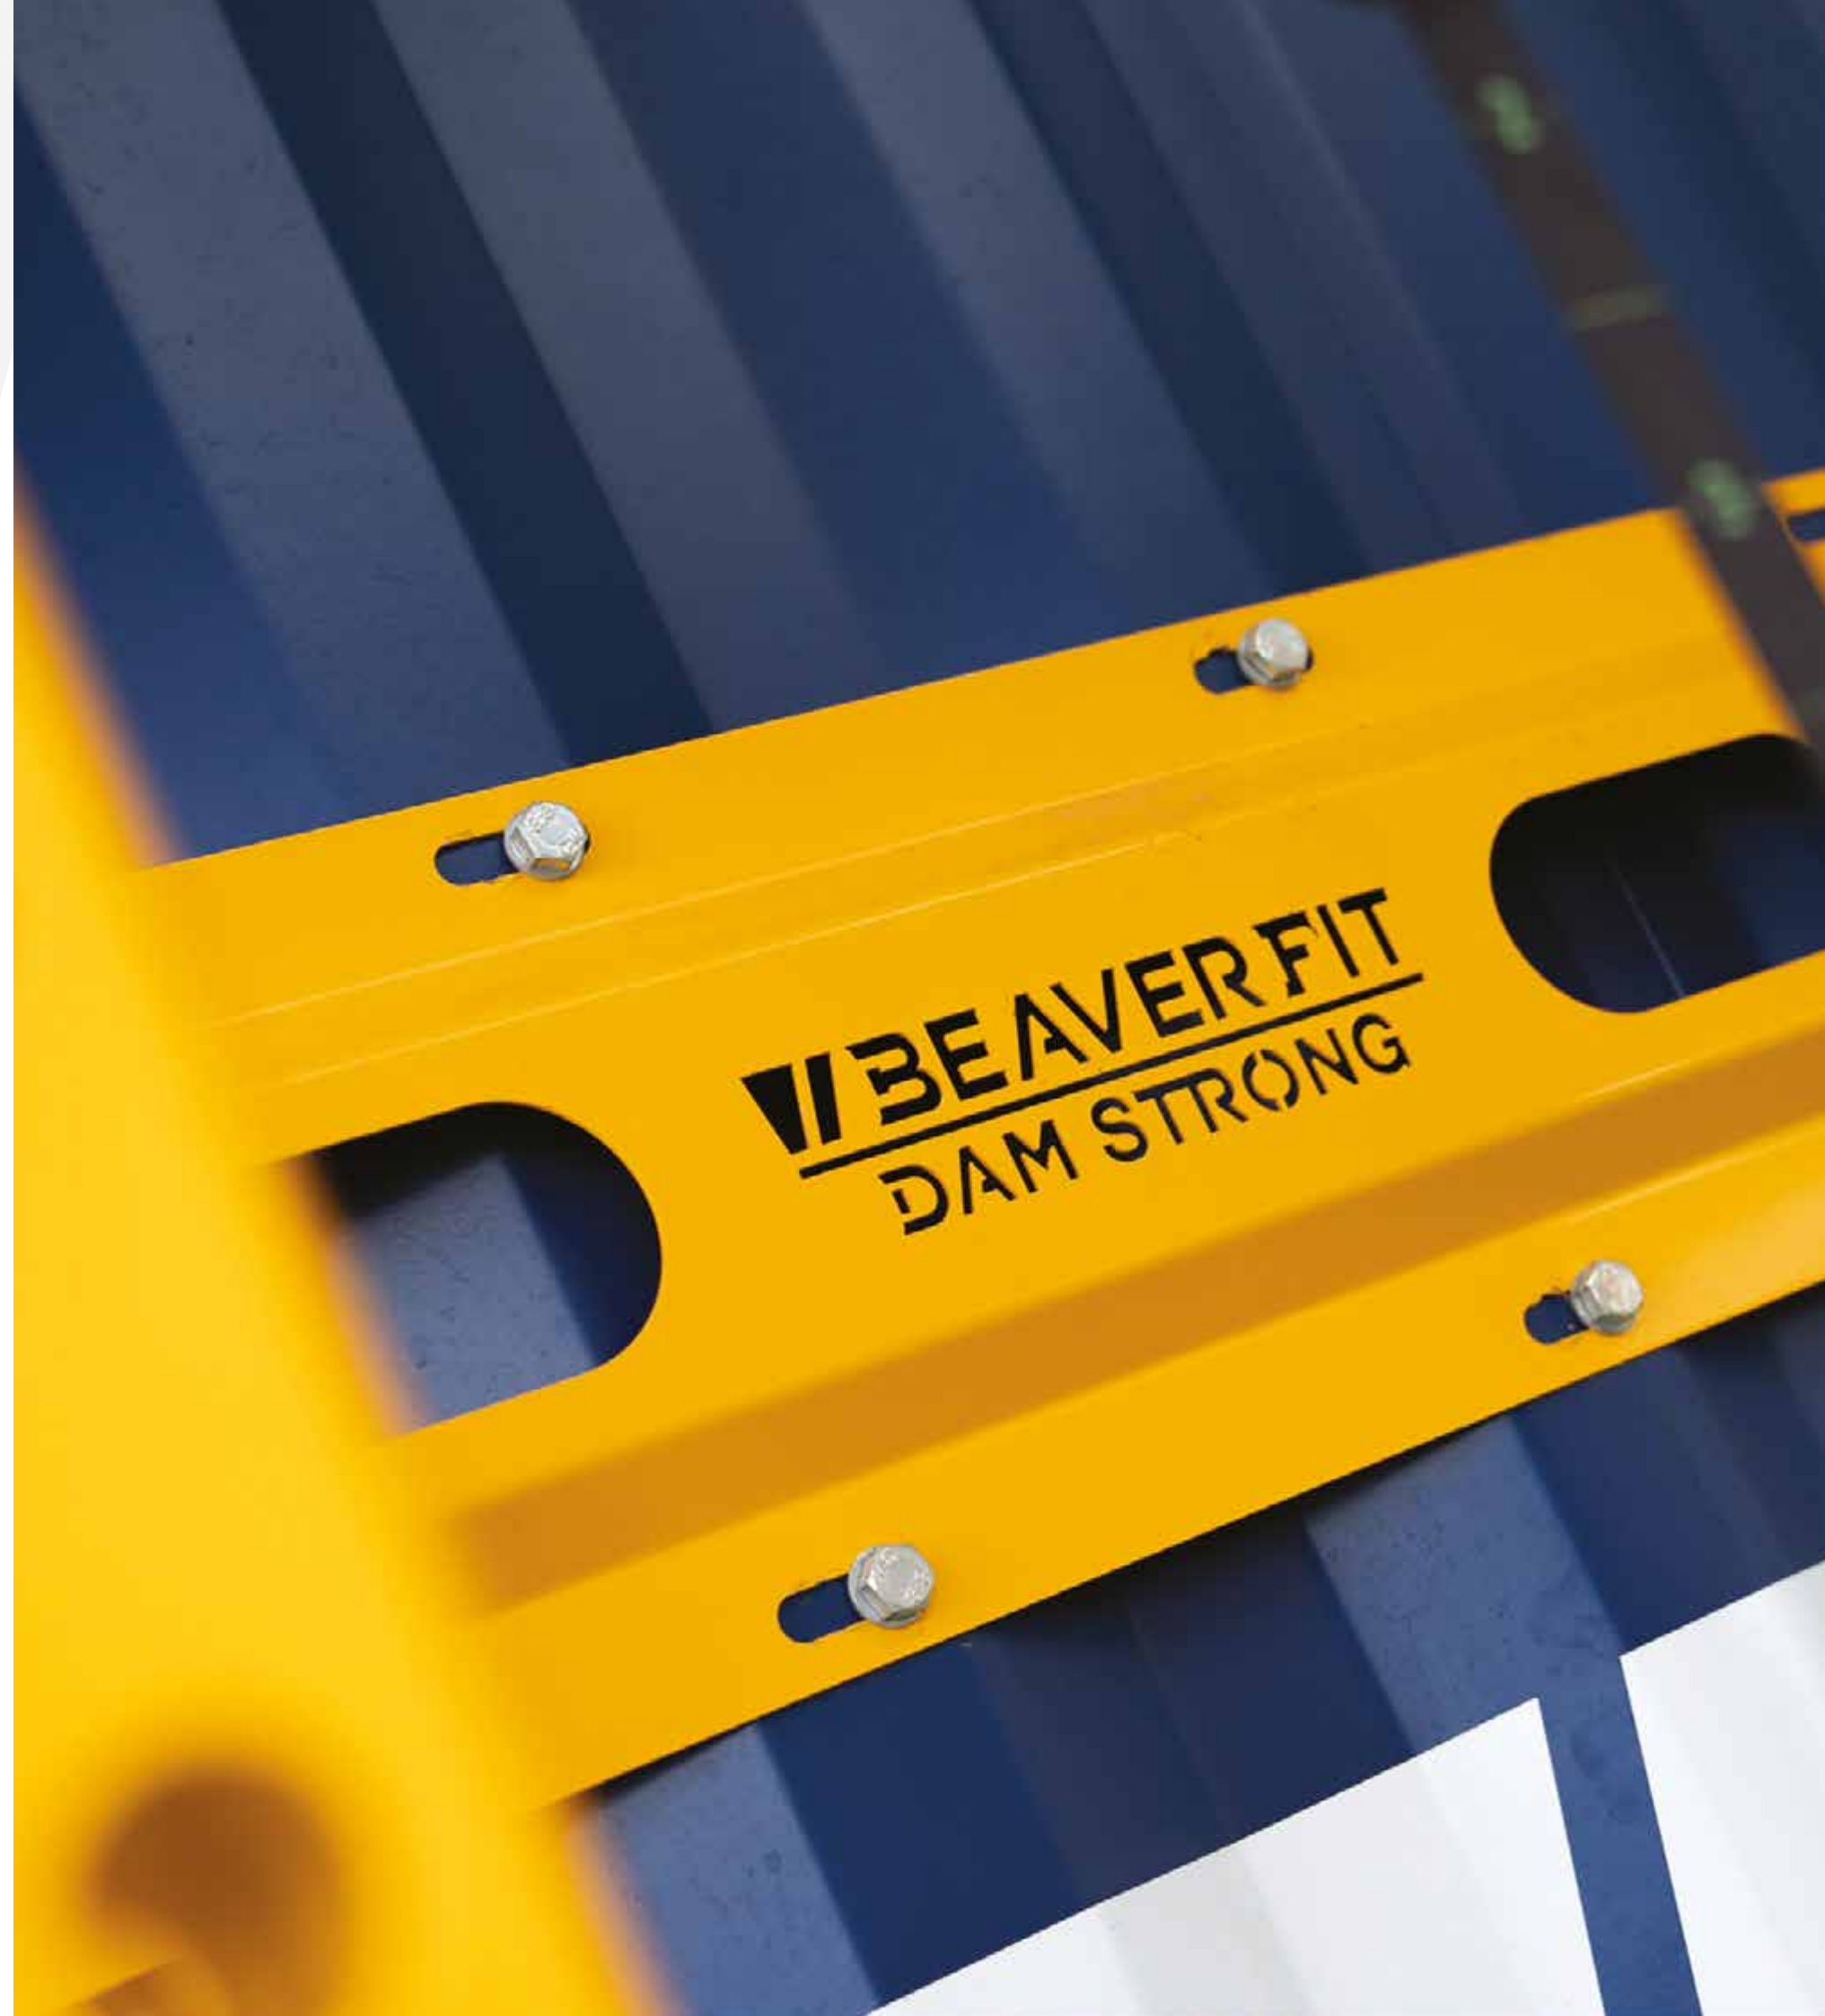

BeaverFit partner with two notable media production firms, in creating post install promotional videos and imagery. This gives us the ability to offer a full 360 media solution to our clients.

Each BeaverFit set-up is built with a goal in mind, be it to improve member retention, further advance current facilities, improve the mental and physical well-being of students or to boost the strength and conditioning of sports personnel. Our media team will work with the client to create professional marketing materials that can be used to further promote the space.

## FITNESS WORKSHOPS

Our dedicated BeaverFit trainers run fitness workshops for both users and facilitators. Offering a further educational advantage and demonstrable performance techniques to the users.

These workshops are hosted for educational purposes only, to demonstrate varied exercises and best practice using our long lasting BeaverFit equipment. This enables low downtime for the facilitator, and an added benefit to the users as they familiarise themselves with their new equipment.

All BeaverFit equipment comes with a warranty specific to product type and usage. Warranty terms do not extend to damage arising from improper use, normal wear and tear, misuse, third-party alterations, or improper maintenance. Any issues arisen that are due to defects of material or manufacturing processes, need to be highlighted within the dedicated warranty period.

## STEELWORK

All BeaverFit steel is fabricated to specific standards offering a limited **5 year warranty**, on internal steelwork and **3 year warranty** on external steelwork subject to a visual inspection to determine the correct care and use has been taken throughout the warranty period.

## CONTAINER SOLUTIONS

All our BeaverFit container solutions are fabricated to specific standards offering a limited **5 year warranty**, subject to a visual inspection to determine the correct care and use has been taken throughout the warranty period.

## ACCESSORIES + ATTACHMENTS

Our Accessories and Attachments are commonly provided by a third party. Warranty period is subject to the offering of the supplier. All warranty information will be provided upon request.

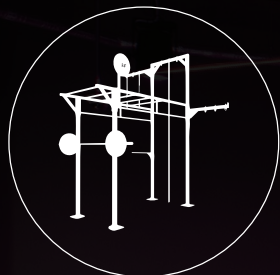

BeaverFit originated from a family of Steel Fabricators, specialising in the industry since 1947.

In 2006, Tom Beaver built a robust and innovative rig to train for the Arch challenge, made entirely from materials used by the family business.

Tom Beaver successfully introduced his product of excellence to the military. Thus, the birth of BeaverFit and further development of innovative products and fitness solutions - dominating the industry since 2010.

Co-founders, Tom and Jim Beaver further developed the product line to introduce the worlds first ever container gym solution - the FOB Locker. Since 2012, over 500 of these solutions have been deployed around the UK and Europe.

In 2015, the industry saw the introduction of BeaverFit Special Operations Equipment (SOE), a sister company to BeaverFit Ltd, supplying sought after and unique Special Operations Equipment, from Training Towers through to Live Fire Shoot Houses.

BeaverFit UK joined forces with two veterans from the USA, forming our sister company BeaverFit North America LLC and imminently winning their first contract with the U.S Marine Corps to supply 300 FOB Lockers.

**12+ YEARS  
IN BUSINESS**

BeaverFit is a world leader in the design, manufacture and distribution of training equipment. With over 12 years in business and a proven track record of product testing by the world's most influential corporations and elite military units.

**MADE IN  
AUSTRALIA**

Using our partner on the Gold Coast, we manufacture solutions to the highest of standards, exceeding all expectations.

**30+  
INNOVATIVE  
SOLUTIONS**

Consisting of Lockers, Rigs, Racks and Strength Equipment, our Human Performance Range is world-class in nature, manufactured predominantly with 5mm steel.

**PATENTED  
PRODUCTS**

This allows us to create products and solutions with the highest level of excellence, that are not available from any other supplier, so you know you are receiving the best product possible.

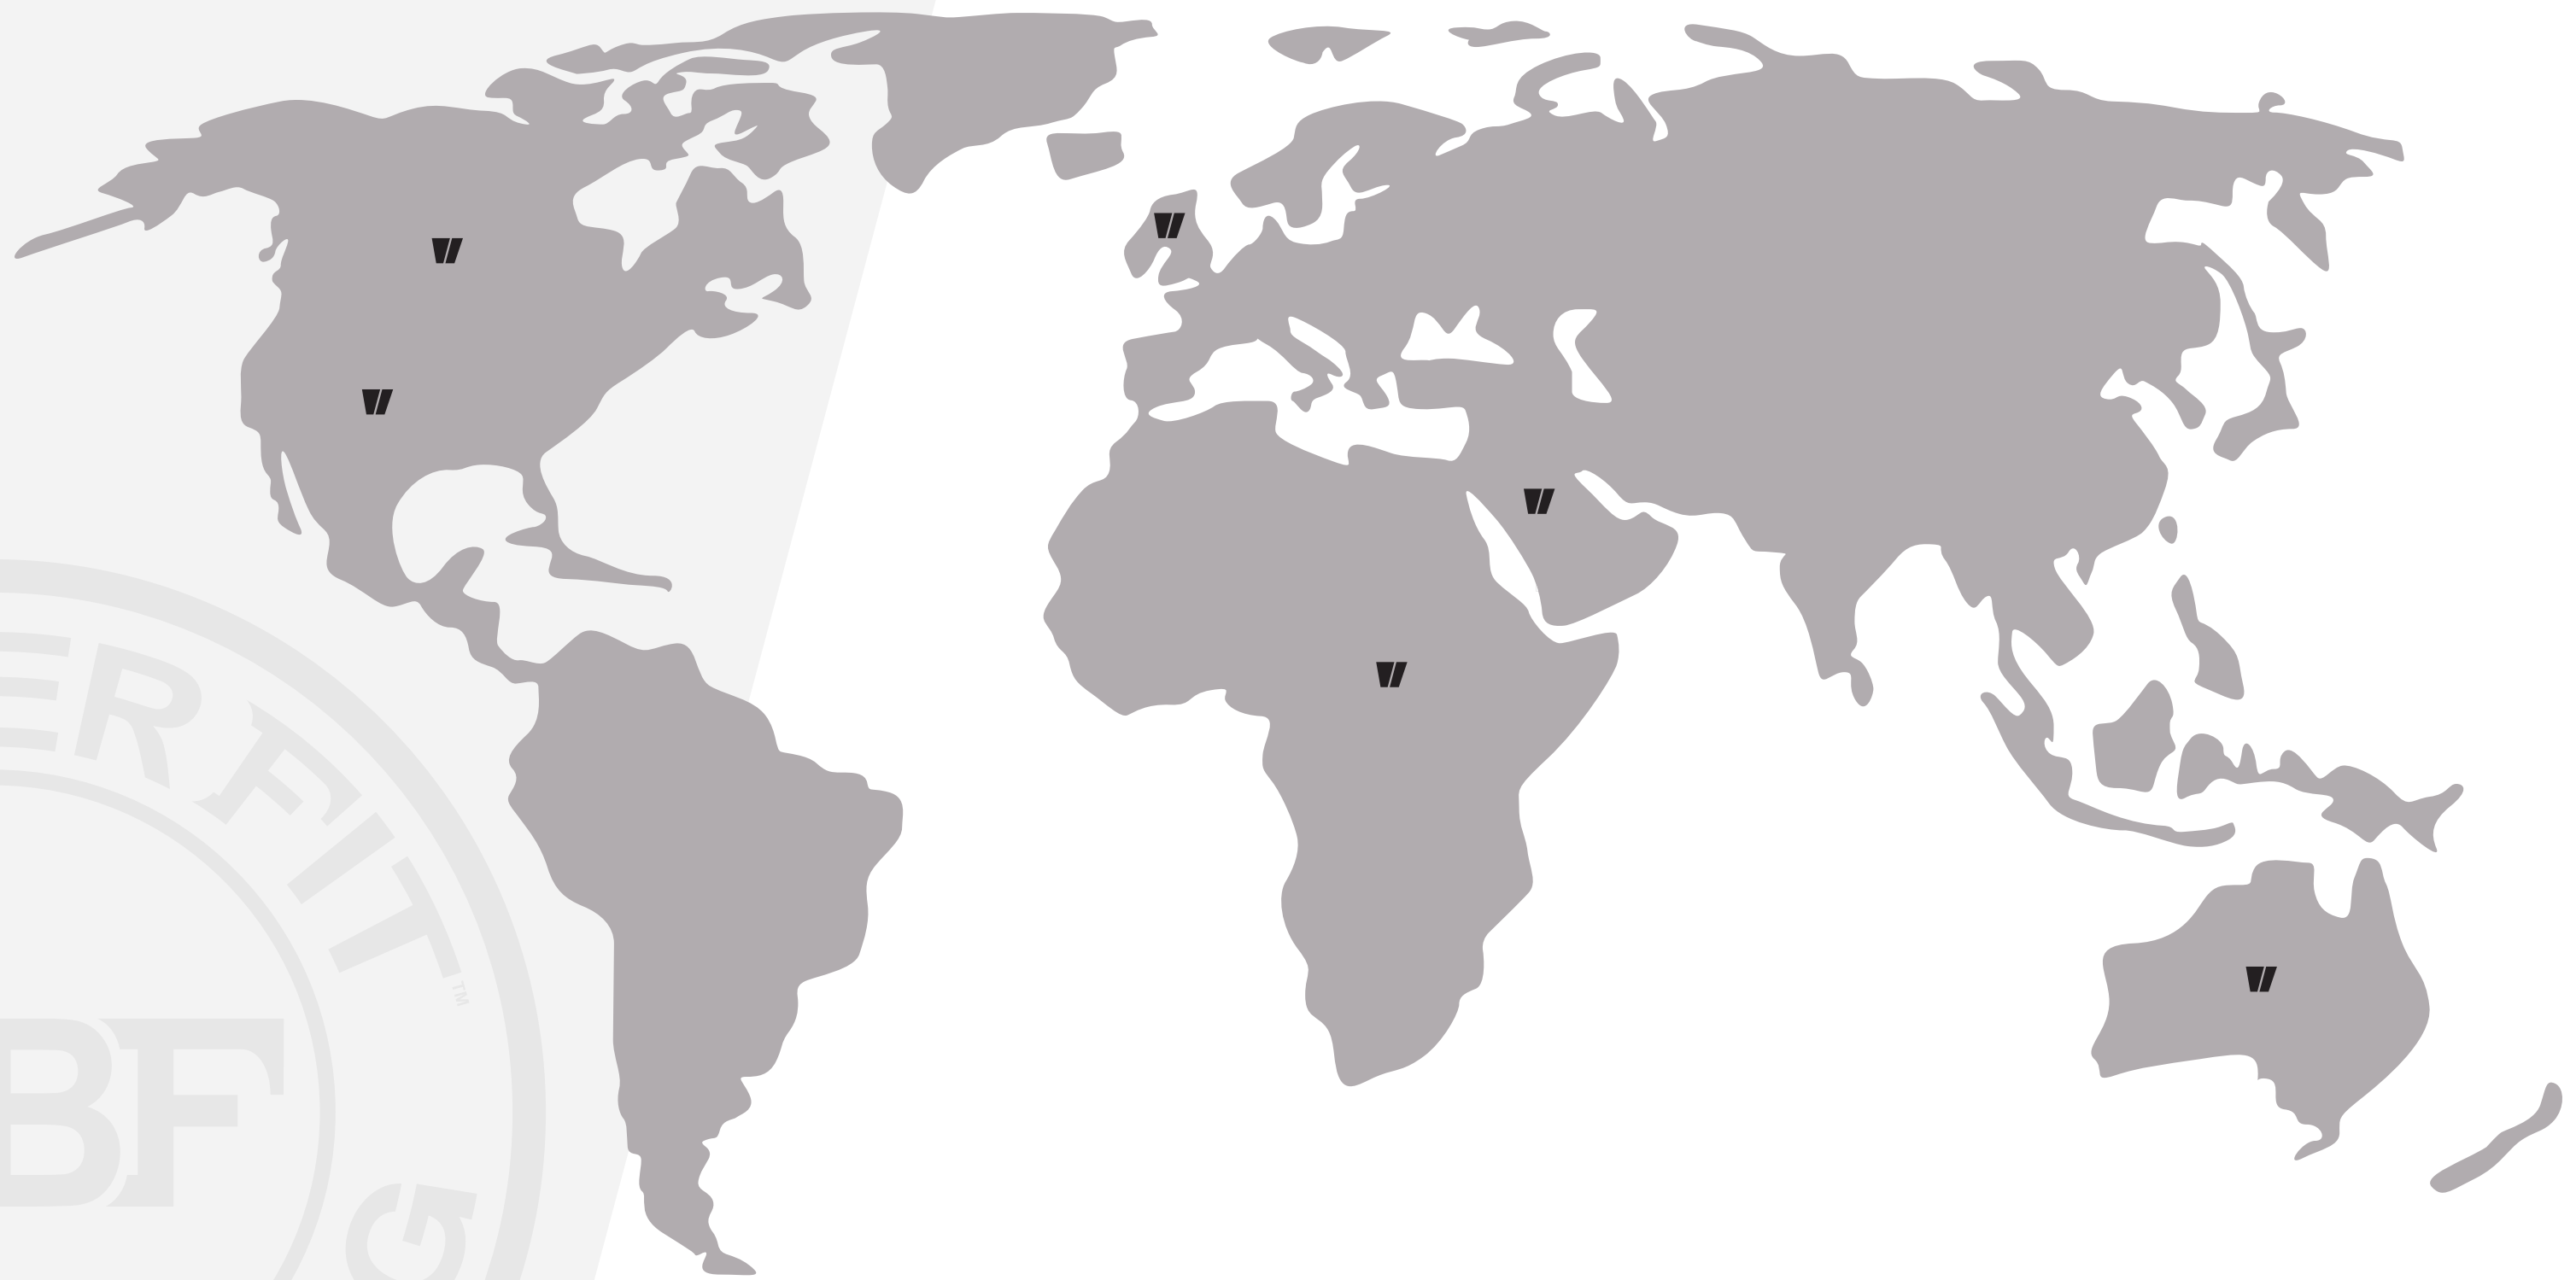

**10,000+  
FACILITIES  
DELIVERED**

With over 10,000 solutions delivered globally, we have a proven track record of expertly delivered projects, that have exceeded expectations from start to finish.
