

WHINNY HILL URBAN TRAINING VILLAGE

The British Army in Catterick wanted to create a new and updated Urban Training Facility, this was to form part of the current Whinny Hill training area with more traditional infrastructure.

BeaverFit SOE designed, manufactured, and installed a large scale hyper-realistic training village for a defence training estate - operated by Landmark. This concept offers urban exercises and activities, and a simulative training that enables the users and operators to train in true to life and situational environments.

This solution was comprised of multi-storey buildings, an Urban Training Tower with Simulated Lift Shaft and Air Delivery Platform, Method of Entry doors and windows, reconfigurable rooms and doors.

BENEFITS + FEATURES

- ▮ Robust + durable, perfect for riot + flammable training
- ▮ Can include realistic, photographic street scenes + building fronts
- ▮ Made with multiple container solutions that are both modular + reconfigurable

“THE NEW STATE-OF-THE-ART TRAINING FACILITY CONSISTS OF THIRTEEN SINGLE AND TWO-STOREY BUILDINGS THAT HAVE MULTIPLE INTERNAL AND EXTERNAL ACCESS POINTS FOR FORCED ENTRY. SOLDIERS NEED TO BE PREPARED TO FIGHT IN URBAN AREAS AND THE NEW FACILITY HAS BEEN BUILT TO HELP PROVIDE A MORE CHALLENGING AND REALISTIC TRAINING ENVIRONMENT FOR TROOPS PREPARING FOR OPERATIONS IN THE MODERN URBAN LANDSCAPE.”

Lieutenant Colonel Mark Holden

North Commander Defence Training Estate
